

Private Space

People do different things in private than they do in public.

People do things in private that they don't do in public.

Here are some things that people do in private:

- burping
- nose picking
- farting
- going to the bathroom

People try really hard to do these things in private.

People get really embarrassed when they do these things in public.

People act differently in public.

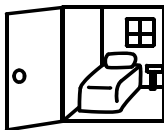

If people need to do private things, they go to a private place.

A bathroom stall is private.

A bedroom can be private.

It is important to know when you are in private and when you are in public!
